

## **Quel Brewing Additives**

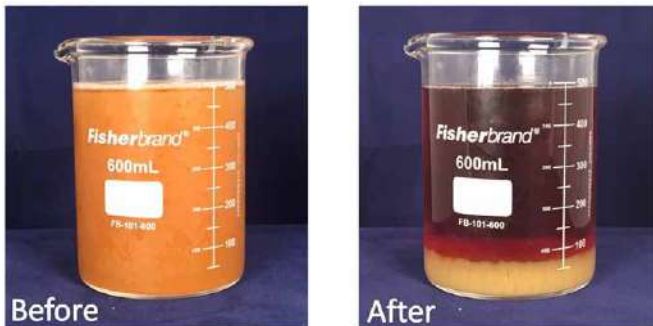

# Quel Beer Clear 30

## High Performance Clarifying Agent

Quel Beer Clear 30 is an aqueous dispersion used in cold-side brewing processes to optimize clarification. The high particle surface area results in the rapid sedimentation of yeast and other particles that contribute to haze.

### Benefits

- Minimizes separation time and energy requirements
- Developed to immediately lower the COGS of a brewery
- No effect on beverage taste or flavor profile
- Meets FDA requirements for Title 21 CFR 172.480(4)(c)

# Quel Firm Control

## High Performance Defoamer

Quel Firm Control is a premium defoamer product formulated for use in brewing applications. It is a concentrated dispersion of extremely effective anti-foam agents, efficient in preventing or limiting foam build-up throughout beer production.

### Benefits

- Useful in fermentation processing, blow-off, and boil-overs
- Ideal foam control in low concentrations
- Formaldehyde-free
- Meets FDA requirements for Title 21 CFR 173.340
