

SANOGENE®

The Ultimate Antimicrobial Product for the Dental Industry

Disinfectant product that controls cross contamination within your dental laboratories and office environments.

The spread of viruses and bacteria by cross contamination throughout the dental work environment is a potential problem. The necessity for better “Sanitation Practices” is real; and now there is a better solution available for you.

Sanogene® has been tested and proven by an independent, non-profit dental products testing group and found to be the best pumice slurry and ragwheel disinfectant available. Additionally, Sanogene® is an excellent overall surface disinfectant, fungicidal and bactericidal product.

Laboratory pumices used for polishing removable prostheses are a potential source of cross contamination between patients and dental professionals. Sanogene® reduces the number of microorganisms in the pumice slurry and will not harm prostheses, produce unpleasant odor, or affect skin. Sanogene® may be applied on environmental hard surfaces where microorganisms and the risk of cross-contamination may exist. It is bio-degradable, hypoallergenic, safe to handle and contains no dyes, alcohols, or sugars. It is effective over a broad spectrum of bacteria and viruses. Sanogene’s active ingredient, chlorine dioxide, utilizes a unique method of killing microorganisms through oxidation. This oxidation process has been proven more effective than chlorination and is less corrosive when used in accordance with label instructions. Sanogene® is EPA registered for dental applications.

BENEFITS

- High speed-of-kill
- Hypoallergenic
- Biodegradable
- Broad spectrum activity
- Convenient - easy to use
- No rinsing
- Compatible with dental impressions
- Low corrosion potential
- No chlorination or THM formation
- Low toxicity, EPA category III
- Non-hazardous shipping
- Effective over a broad pH range (1-10)
- Economical

APPLICATIONS

- Ragwheel Disinfectant
- Pumice Slurry Disinfectant
- Non-porous Surfaces:
 - Counter Tops
 - Tile Floors
 - Walls and Ceilings
 - Walk-In Incubators
 - Stainless Steel Cold Rooms
