

ENZYMIX-L

Preventive maintenance of pipes

Liquid enzymatic detergent for maintenance of pipes. Prevents clogging in any type of pipes (food or sanitary) and hydrolyses all organic residues for improved flow. This product is compatible with grease traps and septic tanks.

ADVANTAGE

- Deep cleaning action
- Removes organic residues in pipes and prevents clogging thanks to the continuous action of enzymes
- Positive impact on grease traps and septic tanks
- Non-irritating for users and hazard-free for pipes
- Positive impact on the environment (discharge of pretreated waste water)

FIELDS OF APPLICATION

• Maintenance of food and sanitary pipes

DIRECTION OF USE

Perform these steps after all sanitation/disinfection steps of the room(s) where drains are located.

First application/start-up

- Prepare a mixture of 16 ounces of ENZYMIX-L in a bucket or container with between 1 quart and 1 gallon of warm water 85-130 ° F (30 -55° C)
- 2 At the end of service, apply one dose in each outlet to ensure effective treatment

Follow-up/maintenance

- 1 Prepare a mixture of 2.5 ounces of ENZYMIX-L in a bucket or container with between 1 quart and 1 gallon of warm water 85-130 °F (30-55°C) and apply twice per week
- 2 Remove the drain cover, grates, etc and slowly pour the mixture around the drain. Do not pour directly into the drain
- Replace the drain cover, grates, etc. Do not pour any liquids (water, detergents, sanitizers, etc) in the drain until the next cleaning cycle to allow the enzymes the maximum amount of contact time
