

Total Beverage Care Program

Since 1920, DuBois has been a leader in providing innovative chemical solutions. We are committed to helping our customers improve their operational processes, reduce their overall costs and meet their sustainability goals.

At DuBois, we offer a wide range of cleaning solutions that are **Lean, Green, & Clean**. We have tailored programs specific to the beverage industry. Our complete array of cleaning products includes:

- Bottle Cooler Technology
- Food Grade Greases and Bearing Lubricants
- Supplemental Lubricants for Nonplastic Interfaces
- Boiler & Cooling Water Treatment
- Wastewater Treatment
- Floor Care Products
- Hand Sanitizers

TM SMART TRACK

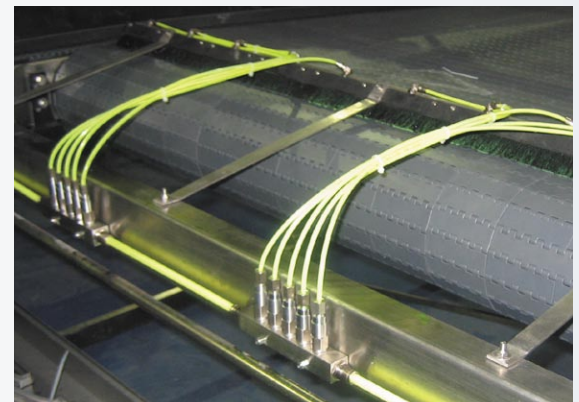

DRY LUBRICATION TECHNOLOGY

Only DuBois brings you the unique “dry lube” technology of **TM Smart Track**. In partnership with Thonhauser, DuBois introduces TM Smart Track - winner of the 2009 Environmental Innovation of the Year award from Drink Tec. TM Smart Track allows you to operate your conveyor system without the cost and inherent problems associated with water diluted lubricants.

TM Smart Track is delivered by a state of the art dispensing system that allows predictable accuracy down to 0.03ml per dosage! This unparalleled level of control ensures an extremely narrow band of operation at an optimal coefficient of friction for every conveyor line in your bottling operation.

TM Smart Track Benefits

- **Lean/Green:** Reduces water consumption and wastewater costs, saving you money
- **Clean:** Eliminates wet foam covered floors and inherent safety problems
- **Clean:** Reduces potential for biological contamination, ensuring product integrity
- **Clean:** Reduces the potential for corrosion, extending capital life

While **TM Smart Track** provides the new standard in conveyor operation, DuBois hasn't stopped there. We recognize the requirements for cleaning a beverage plant are unique, so we design cleaning solutions specifically for your operation. This singular attention to the beverage industry assures your operation has the best technology available at a total operating cost that protects your bottom line.

Yellow Chlor - Open Plant Cleaning (OPC)

Cleaning your production equipment requires a foam cleaning product that can handle soil loading while minimizing wastewater treatment costs. DuBois has developed **Yellow Chlor**, a nonphosphated alkaline cleaner that minimizes wastewater costs and ensures clean equipment.

Liq Oxidet NP - Cleaning In Place (CIP)

DuBois recognizes that the toughest parts of your plant to clean are those surfaces you cannot see, but rely on CIP technology to keep clean.

Liq Oxidet NP ensures your CIP system delivers clean internal surfaces, be it filler bowls, syrup tanks, piping, or other pieces of equipment. Liq Oxidet NP is phosphate free to minimize both wastewater treatment and environmental impact, while assuring you the cleanest possible surfaces.

DuJel Citrus - Seamer

If your plant includes a can seamer, we know this can be a difficult area to clean. DuBois innovative **DuJel Citrus** can be applied to quickly and effectively clean the can seamer.

Dicosan PAA - Sanitizer

Once your equipment is clean, DuBois provides you with the most cost effective peracetic acid sanitizer, **Dicosan PAA**, at a dosage of only 1 ounce per 6 gallons of water to protect your final product's integrity. Dicosan PAA is also approved for use as a bottle sterilant when necessary.

DuBois has an innovative, total beverage care program that can reduce your water, labor and energy costs while providing high quality results. Contact your DuBois representative to start saving on your total costs today!
