

QUEL Food Plant Product Line
Delivering Quality Performance and Economical Solutions

DuBois QUEL Food Plant Product Line

Open Plant Cleaning (OPC)

QUEL ALK Foam

Self-foaming, liquid, chlorinated alkaline cleaner formulated as a general purpose cleaner for use in all food and beverage applications. This product is effective on most food soils, including greases, fats, oils, blood and protein.

QUEL Acid Foam

Self-foaming, liquid acidic detergent designed to remove scale deposits. This detergent is also formulated with additional emulsifying surfactants for removal of other types of soils.

QUEL NoChlor Foam

Self-foaming, liquid alkaline cleaner designed for general purpose cleaning in all food industries. QUEL NoChlor Foam is formulated to effectively remove soils by penetrating deposits, emulsifying and dispersing the soil. This product can be used in foam, manual and pressure wash operations.

QUEL Bucket and Brush

Powdered, alkaline detergent designed for manual cleaning in food and beverage operations. This economical cleaner is formulated with a blend of wetting agents and complex phosphates, providing enhanced cleaning and film-free surfaces.

COP (Clean Out of Place), CIP (Clean-in-Place), Washers

QUEL ALK CIP

Heavy-duty, chlorinated liquid cleaner designed for circulation and spray cleaning of dairy, meat and food processing equipment. This non-phosphate product is formulated primarily for automated CIP systems.

QUEL CIP HD

Concentrated, liquid, caustic detergent formulated for use in spray, soak and circulation cleaning operations. This product is highly chelated to aid in the prevention of scale formation and soil redeposition.

QUEL Acid CIP

Low-foaming, acidic cleaner and descaler designed to remove carbonate deposits. This blended acid cleaner is used for plates and crates, as well as for CIP and HTST (high temperature short time) applications.

Sanitizers

Neuquat

Liquid quaternary ammonium compound designed to sanitize surfaces in beverage, dairy and meat operations. Neuquat reduces or eliminates a wide range of microorganisms when used as directed. This non-corrosive sanitizer is safe to use on all surfaces, including wood, paint, floor tile and metal.

SHS-900

A sodium hypochlorite product that is highly effective for control of bacteria. It can be used as a sanitizer in many food plant processes.
