

Food Industry Product Guide

Food Industry Cleaning and Sanitation Product Guide

Our goal at DuBois is to provide innovative solutions to the food industry which address the challenges our customers face every day. We are committed to provide a complete solution that takes the "total cost" of an application into consideration. Many variables beyond the price per gallon are considered when we propose a solution. Our solutions are designed to minimize the overall cost of operations by reducing labor time, water, and production downtime.

DuBois can provide solutions for nearly every aspect of a food production facility including:

- Clean-In-Place (CIP)
- Floor and General Cleaning
- Specialty Applications
- Laundry and Dish Care
- Open Plant Cleaning (OPC)
- Lubrication
- Hand Cleaning
- Water & Wastewater Treatment

Clean-In-Place (CIP) Products

Our CIP products encompass a wide range of chemistries designed to clean different soils under various conditions. All of these products are specifically designed for CIP cleaning so they are low foaming, easily dispensed, and controlled through standard test methods.

The Alkadet and Hi-Alk line of products are non-chlorinated heavy duty cleaners designed to primarily clean oily soils.

The Liquid Oxidet series of products are chlorinated alkaline detergents designed to clean organic soils including proteins.

DuBois also has an acidic product line for scale removal and applications where an alkaline / acid program is needed for optimum soil removal. The Super Sheen line is a blend of acids and detergents that quickly penetrates, softens and removes scale. Scale can be from hardwater or formed as part of the production process, either way DuBois can remove it.

Sanitizing is a very important step in the CIP process as it helps ensure the products safety and shelf life. DuBois offers three sanitizers for use as part of the CIP process, Dicasan® CIP, Dicasan IO, and Dicasan PAA. Dicasan CIP is an acid anionic and Dicasan IO is an Iodophor. Our newest sanitizer is Dicasan PAA, based on Peracetic Acid, and with a dilution of 1 oz to 6 gallons has a very low use cost.

Clean-In-Place (CIP) Products

Product	Description	US/CA	Liquid/ Powder	SKU	Size
Alkadet	Hardwater-stable detergent		L	11714100	18.9L/5G
				11714470	208L/55G

				11910470	208L/55G
				11910330	1249L/330G
Dicasan PAA	Peracetic acid sanitizer, used for CIP, fruit, and vegetable wash		L	11905100	18.9L/5G
				11905535	202L/53.5G
				11905300	1134L/300G

Heavy-Duty Alkaline

Chlorinated Alkaline

Acids

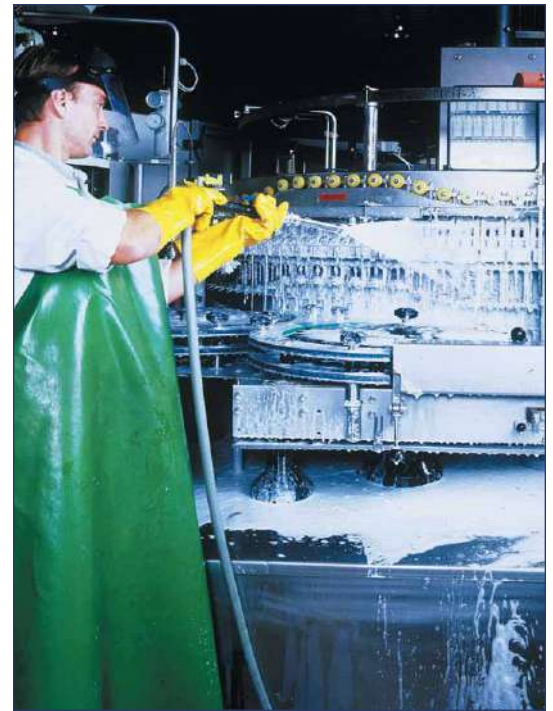

Sanitizers

Open Plant Cleaning Products

DuBois Open Plant Cleaning products are second to none in the industry. We have the traditional foaming chlorinated alkaline in our Master Kleen series of products and the latest innovation in cleaning technology Extecon® (see below). For tenacious cleaning jobs like smokehouses and fryer hoods where you need a heavy duty product we recommend Super Kleen or Alka-Kleen JR.

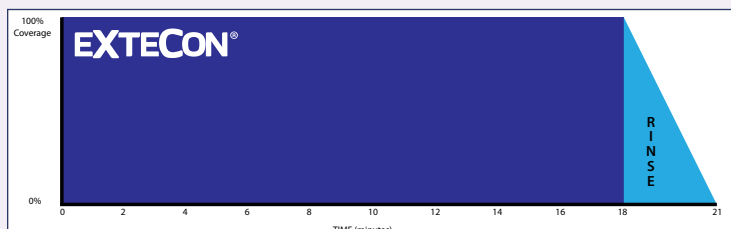

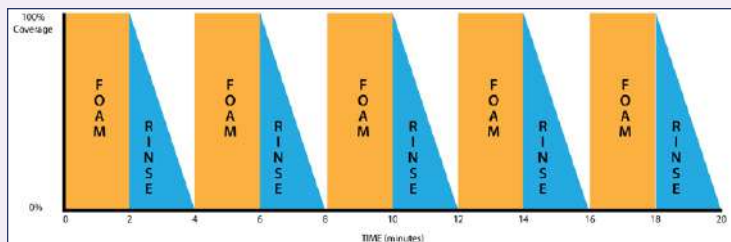

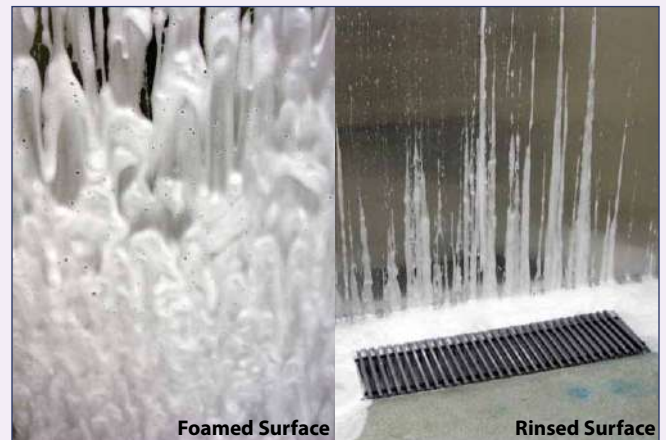

If you don't need chlorine for everyday cleaning we offer an economical powdered product for manual bucket and brush cleaning along with mild alkaline foam products. Hard water spots and dull stainless surfaces are no match for Red Acid Cleaner, a foaming acid used periodically on stainless surfaces to clean and brighten.

Sanitizers offered include 5th generation quaternary ammonium products Neuquat and Dicaquat. Neuquat is a neutral pH sanitizer and Dicaquat is an acid version. Both can be used up to 400 ppm quat as a no rinse sanitizer. If you have a surface to sanitize but can't tolerate water DuBois offers Alpet D2 as a liquid and as a wipe.

ExteCon® Extended Contact Foams Reduce Rinse Requirements

Extecon stands for "extended contact" and utilizes a novel chemistry to clean vertical and horizontal surfaces with less water, chemical, labor and down time. It can be applied using existing foaming equipment with some minor adjustment to optimize the air, water, and chemical mixture. The difference you will see is that Extecon goes on as a flat style of foam compared to the shaving cream type of foam you may be used to seeing, however this flat foam stays in place for as long as 20 minutes. The longer contact time reduces the amount of chemical required to clean because it stays in contact with the soil and doesn't require re-application. No re-application reduces the associated costs of labor and downtime.

A conventional foam at 20 minutes is on the floor, next to the drain waiting to be chased down with gallons of rinse water. Extecon foam is still on the wall after 20 minutes, and when rinsed the foam breaks down quickly, saving gallons of water.

We have two versions of Extecon: Extecon SMS for cleaning applications where soft metal (aluminum) is being cleaned and Extecon GP for applications that don't require soft metal safety. Let DuBois demonstrate Extecon's ability to save money in your facility today!

Open Plant Cleaning Products

Product	Description	US/CA	Liquid/ Powder	SKU	Size
Alka-Kleen JR	Concentrated foam cleaner for use on hard to remove soils typically found in smokehouses and fryers		L	11925100	18.9L/5G
				11925070	114L/30G
				11925470	208L/55G
				11925330	1249L/330G
B-R 5512	Heavy-duty alkaline powder		P	00630014	227KG/500LB
Super Kleen	Premium high alkaline foam cleaner for tenacious soils		L	11585100	18.9L/5G
				04198015	208L/55G
Blue Foam Cleaner	Mild alkaline foam cleaner designed to cut through fats, oils, and greases with daily use		L	00701280	4X3.78L/1G
				00701470	208L/55G
DuBois Bucket & Brush Cleaner	Manual cleaner for use in bucket and brush applications		P	11887380	16KG/35LB
				11887240	136KG/300LB
Rapid Kleen	Solvented, mild alkaline degreaser		L	03844014	208L/55G
Super Kleen Ultra	Mild alkaline foam cleaner		L	11730100	18.9L/5G
				11730470	208L/55G
ExteCon GP	Extended contact cleaner provides three times the contact time compared to conventional foam; rinses easily using less water		L	11915100	18.9L/5G

General Purpose Cleaners, Degreasers, and Floor Cleaners

DuBois is an industry leader in general purpose cleaners, degreasers, and low foaming floor cleaners for use in automatic floor scrubbers.

DuBois has been recognized by the United States Environmental Protection Agency (EPA) as a partner in the Design for the Environment (DfE) program. The first two products from this partnership are Treo Neutral Floor Cleaner and Treo General Purpose Cleaner. Treo products outperform the industry norm using readily biodegradable surfactants, and without harmful solvents, phosphates, or hazardous air pollutants.

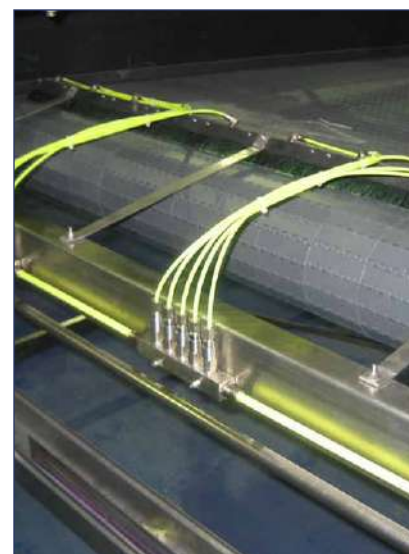

Product	Description	US/CA	Liquid/ Powder	SKU	Size
C-1102	High foaming degreaser. Available in CA; not CFIA approved.		L	11535100	18.9L/5G
				11535017	208L/55G
				11535330	1249L/330G
DuBois Quick Lift	Patented floor cleaner that will not strongly emulsifying oil and grease, easy to waste treat. Available in CA; not CFIA approved.		L	11551100	18.9L/5G
				04095470	208L/55G
				04095330	1249L/330G
Jettacin	d-Limonene based degreaser		L	11599100	18.9L/5G
				11599010	208L/55G
				11599690	1249L/330G
				11599150	Bulk
Neutra-Lift	Close to neutral pH floor cleaner; low foaming; for use with a mop and bucket and automatic floor scrubbers. Available in CA; not CFIA approved.		L	11143100	18.9L/5G
				11143470	208L/55G
				11143330	1249L/330G
NFP Jettacin	No flash point version of Jettacin. Available in CA; not CFIA approved.		L	11609100	18.9L/5G

				11919330	1249L/330G

DuBois has a full line of conveyor lubricants ranging from soap based chain lubricants, synthetic lubricants and dry lubricants. Our soap based products can be used on the entire conveyor, but are predominantly used for can transfers and other applications where dry lubricant cannot be used. Synthetic lubricants are best suited to applications where hard water or microbiological problems exist.

Only DuBois brings you the unique “dry lube”™ Smart Track Program. In partnership with Thonhauser, DuBois is able to provide this dry lube system – winner of the 2009 Environmental Innovation of the Year award from Drink Tec. This state of the art program accurately controls application down to 0.03 ml per dose giving unparalleled levels of control ensuring the optimal operation of every conveyor in your operation. This fully integrated program of dispensing equipment along with TM Smart Track dry lube is available for a monthly fee that includes installation and servicing.

In addition to conveyor lubrication we offer a line of food grade oils and greases.

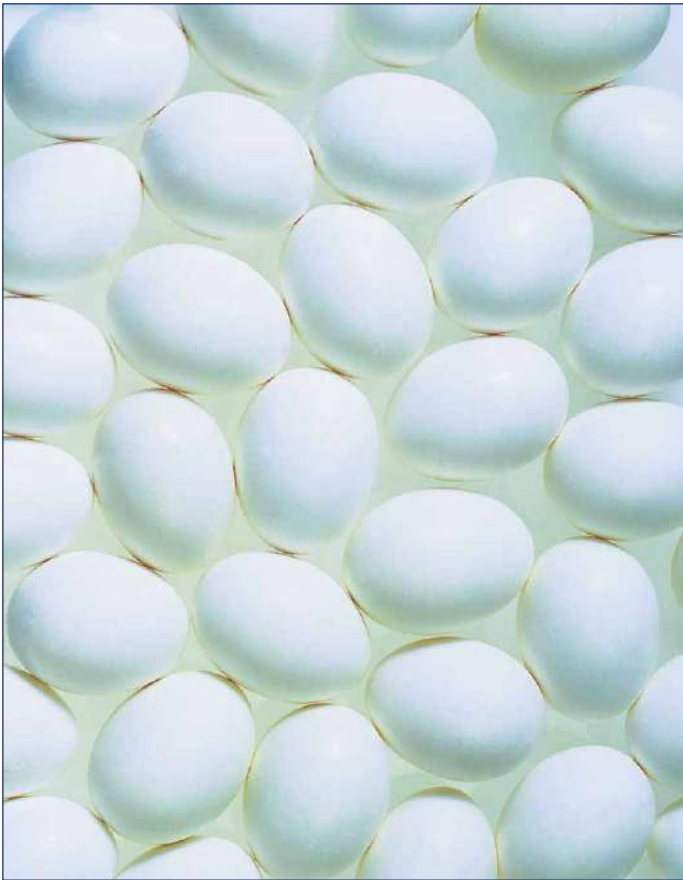

Conveyor Lubricants

Product	Description	US/CA	SKU	Size
Super Loob	Concentrated lubricant used with soft water		02890100	18.9L/5G
			02890014	208L/55G
			02890483	1249L/330G
Super Loob 134	Concentrated lubricant for up to 5 grain hard water		02892012	208L/55G
			02892330	1249L/330G
Super Loob DB	Used for heavy containers on slower moving conveyors; used up to 10 grain hard water		11939470	208L/55G
			11939330	1249L/330G
Super Loob JT	Concentrated lubricant for up to 10 grain hard water		11912470	208L/55G
			11912330	1249L/330G
Super Loob OF	Concentrated, premium lubricant used with any degree of hard water		11940470	208L/55G
			11940620	1041L/275G
Super Loob SYN	Synthetic, cationic lubricant used with any degree of hard water		11913470	208L/55G
			11913330	1249L/330G
TM Smart Track	Dry conveyor lubricant		Even billing program	

Greases & Oils

			11812010	208L/55G

Specialty Products

DuBois offers specialty niche products designed for a specific purpose. Our additives are designed to foam, gel, or boost cleaning performance of other products. Also we offer processing aids such as scald additives, peeling aids, and antimicrobial intervention products for beef and poultry (AviBrom & BoviBrom). Sterilex is another product designed to specifically target disinfection and bio-film removal.

Some of the specialty applications we have products for include:

- Egg cleaners
- Peel/vegetable wash
- Antimicrobials for poultry and beef
- Sweetwater treatment

BoviBrom® for Beef

BoviBrom effectively reduces Salmonella and E. Coli levels on Beef Carcasses at room temperature without noxious fumes, dangerous chemical mixing, or corrosive acid solutions.

BoviBrom is approved for use on beef hides, carcasses, heads, and organs. The active ingredient is based on bromine and is used at a maximum of 300 ppm free bromine, which is monitored with a simple colorimetric test. BoviBrom comes as a dry dense nugget that is dissolved in water through an application system. DuBois will engineer and install a feed system to fit your unique situation no matter how large or small. The nuggets are package in 50 lb pails and each pail treats approximately 850 carcasses.

AviBrom® for Poultry

Approved for use in chill tanks, scalders, process water, and inside-outside bird washers, AviBrom is a foundational product for total pathogen control programs in poultry plants. AviBrom reduces Salmonella, Campylobacter, and E. Coli levels in Poultry-Processing Plants without noxious bleach fumes, corrosive chemicals, or dangerous chemical mixing. The active ingredient is based on bromine and is used at a maximum of 100 ppm free bromine, which is monitored with a simple colorimetric test. AviBrom comes as a dry dense nugget that is dissolved in water with an application system. DuBois will engineer and install a feed system to fit your unique situation no matter how large or small. The nuggets are package in 50 lb pails and each pail treats 170,000 to 200,000 carcasses.

Sterilex Disinfectants for Drains and Equipment

The patented EPA registered Sterilex® disinfectant program has been customized to address the sanitation challenges and solve quality control issues where routine cleaners and sanitizers are ineffective. Based upon PerQuat™ technology, a patented alkaline peroxygen chemistry with phase transfer catalysis, this product kills pathogenic and spoilage organisms as well as remove the biofilm in which they live.

Add 6 ounces of Sterilex Ultra Disinfectant Solution #1 and 6 ounces of Sterilex Activator Solution per gallon of water. Put the mixture in a foaming device for application. Use a special foaming attachment for drains. Fill the drain with foam or foam down the surface to be cleaned. Allow 10 minutes for foam to subside, then apply a no-rinse sanitizer. Once mixed, the solution should be used within 24 hours.

Registered trademark Sterilex.

Hand, Dish, & Laundry Care

VersaClenz Hand Hygiene System: This revolutionary new dispensing system takes hand hygiene to a whole new level by offering simplicity. An all in one hand hygiene system, the VersaClenz will dispense a spray (hand sanitizer), foam (hand soap), or liquid/gel (hand soap). This one dispenser system will dispense all the Hand Shake Hand soaps and Sanitizers reducing inventory while maintaining product options. No more special dispensers for different soaps and hand sanitizer, the VersaClenz dispenser does both. The universal bottle system allows them to be used in both the manual and touchless dispensers.

Pan/Dishwashing: Multi-Terj STS is a soft metal safe pan detergent that is low foaming for use in automatic pan washers. The Disheen product line is designed for dish washing both manually and in a dishwasher.

DuBois Signature Line of Laundry Products: For our food customers with an on premise laundry we offer the Signature line of products designed for commercial washers. This range of products allows us to custom tailor the detergent to meet the customer's desired results.

Equipment

DuBois can help source and supply dispensers and application equipment. We provide systems from simple eductors on up to central dispensing systems. We have portable and wall mounted foam applicators. Our sales force and equipment department are ready to help find the right equipment for the application and within your budget.

Powder in a Bag in a Box (PBB)

PBB is a patented program available for cooling and boiler applications. The equivalent of a drum of liquid is now replaced with a cardboard case. No more disposal problems. Just toss the empty bag and cardboard box into the recycle bin.

Cooling Tower Treatment

DuBois cooling treatment programs center on Safety, Simplicity and Convenience. Our innovative PBB program focuses on meeting our customers' needs through water saving and energy savings by lowering freight costs and warehouse footprint. We carry a full line of thermal processing treatment options as well.

Boiler Treatment

DuBois boiler treatment programs focus on providing solutions for your applications. Our All-In-One Confidence PBB products can enhance the safety of your operation while protecting your systems. Our boiler treatment line is compliant with USDA and FDA requirements for food applications.

Wastewater Treatment

DuBois carries a full line of coagulants, flocculants and emulsion breaking chemicals. We specialize in integrating upstream production with downstream wastewater treatment operations. Programs are chosen with confidence in both results and compliance.
