

Spray Wand Pretreatment

DuBois Spray Wand Pretreatment Products

Degreasers

GF Clean 3045

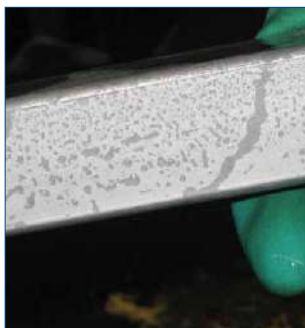

Liquid cleaner that is effective on dust, oily soils, soft carbon (soot) deposits and grease accumulations. GF Clean 3045 is biodegradable and is USDA approved (A1).

treo Jel D

Dilutable gel cleaner that removes dirt and oil from bare metal and painted surfaces. treo Jel D is readily biodegradable, non-corrosive, contains no phosphates and is U.S. EPA DfE recognized.

DuJel 870

Ready-to-use, heavy-duty gel cleaner that clings to vertical surfaces. DuJel 870 has a mild pH and is solventized.

Rust and Scale Removers

GF Acid Clean 72

Hand applied conversion coater.

GF Acid Clean 386

Concentrate designed for use in pump-up sprayers, followed by high pressure water rinse for removal of scale and rust.

DuJel 200

Ready-to-use gel that targets rust and scale deposit. In metal fabrication, DuJel 200 has eliminated sand blasting and grinding which greatly reduces labor costs.

DuJel 300

Organic acid gel for passivating stainless steel and removing mineral scale and mild flash rust.

Cleaner/Iron Phosphate

GF Prep 658

Highest salt spray, appliance quality coating. CAT approved.

Secure Steam FRP

Excellent for multimetal applications. Flash rust protection without Molybdenum. Salt spray equal to GF PREP 658.

GF Prep 608

Historically used in one-step, no rinse applications. Salt spray will be reduced without rinsing.

GF Prep 618

Solventized for heavy oils. Similar to GF Prep 608. CAT approved.

GF Prep 626TP

Great overall cleaner often used in no rinse, non salt spray applications. GF Prep 626TP is excellent for low quality hot rolled steel and cleaning smut and weld smoke.

Phosphate-Free Pretreatment

DuraTEC Wand FRP

Good flash rust protection.

DuraTEC Wand 300

Best for high M-Alkalinity water.

Sealers

duraLINK 450

Transition metal based corrosion resistance treatment with adhesion promoter. duraLINK 450 is ideal for post DuraTEC zirconization pretreatment.

spectraLINK

Silane final seal that enhances paint adhesion and corrosion resistance.

GF Seal Prep 639

Alkaline final seal that also provides moderate flash rust protection.

Equipment

PEM 300

Proven wand system that requires little to no maintenance and provides excellent paint pretreatment results when coupled with the correct DuBois chemistry.

Rust Preventatives

Rust Prevent SYN-3X

Used at 1 -2% to rinse away acid cleaners when removing rust and scale.

GX Proof 5050P

Recommended for applications requiring painting on cast iron.

Maintenance

Desperse X

Coil conditioner for use with a spray wand unit to maintain heating coil efficiency.

PGA-OH

Neutralizes acid pretreatment solution discharged from a spray wand unit.
