Take the DuBois Challenge!

Perma-Gard Zinc Phosphating

Take the DuBois Challenge!

DuBois guarantees to lower the operating costs of your zinc phosphating system up to 30% annually.

Give DuBois 30 days to prove the value of our savings and service.

To take advantage of this offer, allow us to:

- Perform a system audit
- Present the findings of our audit
- Provide a complete system charge and 30 days of replenishment chemistry

ALL AT NO CHARGE TO YOU!

Reduces the Cost of Zinc Phosphating

- Reduces energy usage by operating at low temperatures
- Reduces chemical consumption
- Decreases maintenance costs by minimizing sludge
- Minimizes down time and start up costs by maximizing bath life
- Minimizes impact and costs associated with wastewater treatment

Delivers Superior Quality Through Innovation

- Offers higher resistance to corrosion
- Works in immersion and spray applications
- Produces tightly packed 2-10 micron crystals
- Maximizes coating adhesion and salt spray resistance
- Produces coatings that readily accept an electrocoat and powder coatings
- Coats multiple metal types
- Patent pending technology

The DuBois team approach ensures a smooth start up!
