

Boiler Water Treatment

Put DuBois Expertise To Work For You!

DuBois has over 65 years of boiler treatment experience and uses a team approach to serve our many customers across North America. Your system will be cared for by highly trained, experienced, local and regional technical sales representatives.

“All-in-One” Treatments

DuBois offers a comprehensive line of multifunctional blends that include high performance oxygen scavengers, internal boiler deposit and corrosion control chemicals and balanced blends of condensate system corrosion inhibitors.

True all-in-one offerings include both liquid products and our exclusive **PBB Powder-In-A-Bag-In-A-Box** dry delivery platform, including our unique, patented, powdered amine technology in the Confidence C PBB family of products.

Sludge Dispersants

High performance blends of polymeric dispersants and sequestrants condition and suspend hardness and metal oxide sludges, facilitating their removal with boiler blowdown.

Oxygen Scavengers

Boiler corrosion control with a full line of sulfites and organic, passivating oxygen scavengers including GRAS Erythorbates for FDA/USDA food and beverage plants.

Condensate Treatments

Balanced blends of neutralizing amines for corrosion control of any size or type of condensate system and nonamine filming technology that meets dairy requirements.
